Objective

Detailed oriented I.T student with comprehensive understanding of coding and designing. Seeking to use and enhance my coding and design skills during this internship.

Academic Projects

✓ Blog Management System

- Created a web-based blogging platform with essential features to keep it evolving.
- Laravel, HTML, CSS, JavaScript, and MySQL were used with XAMPP as a local host.

✓ Employee Payroll Management System

- Created a web-based system for managing employees' leave that keeps track of their absences and uses leave letters to keep payroll current.
- Laravel, HTML, CSS, JavaScript, and MySQL were used with XAMPP as a local host.

✓ Poster for futsal team

- Used Photoshop to produce a team poster for the futsal squad during the academic sporting event.

✓ Prototype for Ecommerce website

- Using the agile methodology and Adobe XD to design and develop a working prototype based on an e-commerce website.
